

Corporate Social Responsibility Vision

Drylock Technologies NV is passionately committed to strive for excellent customer satisfaction by keeping a high customer focus, a fast rate of innovation and an ongoing self-challenge for continuous improvements. But this is not where the story ends. We are dedicated to do business in a responsible and ethical manner, by respecting and protecting the partners we work with, the communities we work in and the planet we work on.

This translates into protecting and preserving the global environment, adhere to the highest business ethics by working with integrity, openness and respect towards all stakeholders, and by keeping both human as well as animal rights in high esteem.

These core values are translated into quality, safety, sustainability and corporate social responsibility targets which are regularly evaluated and strengthened.

The story never ends -this devotion is our contribution towards building a better world.
